

IT-Organization of the future

Digital transformation, cybersecurity risks, complex structures, a lack of specialists - IT departments don't have it easy. They are supposed to be drivers of innovation and new technologies ideally had to be implemented yesterday. It's easy to lose sight of the big picture. A customized and future-oriented IT strategy can help.

OF TOPIC JUGGLERS AND INNOVATION DRIVERS

The IT strategy is a vital part of the corporate strategy and describes how IT should support the company's goals. So much for the definition. However, when properly understood and implemented, the modern IT organization is so much more: an essential cornerstone for the competitiveness of companies.

In many cases, IT managers are faced with several challenges: The complex IT landscape that has grown over decades with a large variety of hardware and software components has to be managed, cyber-attacks must be fended off, and on top of it all, qualified IT specialists must be found for this. There is often simply not enough time for innovative, forward-looking topics – and no clear and consistent IT strategy that provides a framework and direction.

Help your IT and get a strong strategic partner at your side as management. With a future-oriented and customized IT strategy. We will be there to assist you.

IT-ORGANIZATION OF THE FUTURE

We support you in the development of a holistic and well thought-out IT strategy and in the creation of the necessary framework conditions that are needed to make IT work as a strategic success factor in the company in the best possible way.

YOUR RESULTS

As part of our partnership, you will receive...

HOLISTIC VIEW

... a holistic view of your company, in which the IT strategy makes a significant contribution to achieving the company's goals. We analyze the internal organizational components (structures, processes & systems, leadership, people & culture) as well as the external influencing factors (customers, regulations, technologies, competition).

DIRECT FEASIBILITY

... a continuously successful and readily implementable IT strategy, which will be developed in a multi-perspective manner, tailored to your company and for which we only use methods and practices that really suit you.

RELEVANT METRICS

... specific key performance indicators that you can use to evaluate the success of our collaboration. We don't build castles in the air but create real added value.

PROCESS OF OUR COOPERATION

ANALYSIS OF THE CURRENT SITUATION

Capturing the status quo.

We gain an in-depth understanding of your IT landscape: What does the infrastructure look like, which processes are used how, when, and where? What about the security situation? How is your IT organization structured? How do you communicate and interact, in short, what is your IT culture like? With this information as a basis, we move forward to the next phase.

IT ORGANIZATION OF THE FUTURE

In a workshop with your company's IT managers, we define the economic, strategic and qualitative goals of your new IT strategy – and of course in alignment with your overall corporate strategy. With this outlook in mind, we devote the next phase to strategy development and the project sequences required to achieve the goals.

Defining the goals of the new IT strategy.

**STRATEGY DEVELOPMENT
& ROADMAP**

03

**Bringing together the "what" and the
"how" into an actionable roadmap.**

You will get a tangible picture of your new IT strategy tailored to your company with a suitable approach and an implementation plan (IT roadmap). This way, your goals do not remain mere abstract words, but are given substance. The implementation of the next steps can then be carried out.

04

GUIDANCE & VALIDATION

Now the time has come: your IT organization of the future is ready to become reality. We accompany the process of implementing your roadmap and are also there for you in case things go sideways. We always act on the principle that nothing is as reliable as change. If parameters change, we adapt the roadmap according to the newly gained insights.

Walking the path together.

THE ORCHESTRATION OF DIGITAL INITIATIVES AND PROJECTS WITHIN A COMPANY IS OFTEN UNDERESTIMATED. ALL TOO OFTEN, WE ENCOUNTER SILOS OF THINKING THAT ARE NOT INTERCONNECTED. AN IT STRATEGY IS THE KEY. IT IS TO BE UNDERSTOOD AS A COORDINATED PROGRAM WHOSE COMPONENTS INTERLOCK, BUILD UPON EACH OTHER AND PROVIDE AN OVERVIEW.

MAREN RIXEN, EXECUTIVE DIRECTOR & EXPERIENCED SME CONSULTANT FOR PROCESSES & DIGITALIZATION

QUICK FACTS

Result: You get an IT strategy that fits your overall corporate strategy, with a suitable approach and an implementation plan that we put into practice with you – always with the necessary flexibility in case the parameters change.

Duration:
3-6 months strategy development with subsequent implementation

WHY ALLFOYE

Our core business is the holistic transformation of organizations. With this experience, we dedicate ourselves to a key success factor: IT strategy.

Our claim is to develop strategies that will still be valid tomorrow, that are tailored to your company and that will really get you into implementation.

We are optimists for the future, believe in the sustainable and digital innovative power of SMEs, and see transformation as an opportunity for a successful European economy and a society worth living in. Based on this drive, we accompany companies with good concepts, creative ideas and effective product and service solutions to successful and resilient organizations.

In doing so, we also draw on our unique network of startups, technology partners and companies from business and science.

We are part of the All for One Group SE.
